Subject: A SOLUTION FOR YOU...to WSEW Public Streaming Elimination (New IP effective 2/15/17)

As you know we have found it necessary to curtail public streaming of our WSEW, Word Radio programming for 2016. We now have a change in sourcing IP address starting immediately. The old IP will be useable until 2/15/17 where only the new IP will continue on immediately.

If you have been adversely affected by this development, we want you to know that you are welcome to listen to our private emergency programming IP source, <http://166.62.80.146:8020/listen.pls> that we use for emergency programming transport to our FM transmitter in the event that our normal studio to transmitter link (STL) goes down. Just configure the above IP address into any mp3 decoder such as Streema, WinAmp, etc or into TuneIn (Go to My Profile, scroll to bottom, enter Custom URL). We are saddened to be required to curtail public streaming. We hope this helps you. If you have any questions or need additional assistance please contact me.

Thank you.
